space**

Guest Room No.2

Two bedrooms

One shared bathroom

Outdoor living area

**Bamboo and
fiberglass verandah**

IN PROGRESS

MAINLY USED FOR HOUSING

**BUT IT COULD
BE ALSO THIS**

IF YOU HAVE
PLENTY OF
TIME.....

IT ALL STARTS
FROM HERE

BENEFITS OF ADOBE CONSTRUCTION

- **MOSTLY NATURAL**
- **FLEXIBILITY IN DESIGN AND DECORATIVE STYLES**
- **NO NEED FOR EXPENSIVE TOOLS/MAIN INPUT IS LABOUR**
- **IT'S FUN AND EVERYONE CAN DO IT**
- **NO WASTED MATERIALS AND VIRTUALLY NO DECAY**
- **AWESOME THERMAL PROPERTIES**

IMPORTANT!

ADOBE IS A TECHNIQUE WHICH ORIGINATED IN DRY CLIMATES.

USING ADOBE IN A TROPICAL SETTING REQUIRES A NUMBER OF MINOR ADJUSTMENTS.

A CLOSE OBSERVATION OF THE PROPOSED SITE THROUGH A FULL RAINY SEASON IS ADVISED

BASIC DESIGN RULES FOR THE TROPICS

- **RAISED FOUNDATIONS**
- **OUTDOOR COOKING/LIVING AREA TO THE NORTH IF POSSIBLE**
- **LARGE EAVES OR VERANDAHS ON ALL SIDES IF POSSIBLE**
- **GOOD RAIN WATER RUNOFF MANAGEMENT**

HOW TO CHOOSE YOUR SOIL

- **USE YOUR OWN SOIL ONLY IF YOU REALLY NEED A POND**
- **BRINGING IN SOIL IS CHEAPER THAN DIGGING**
- **NO STONES IF POSSIBLE**
- **MAKE SOME TEST BRICKS AND FIND THE SOIL/SAND RATIO FOR YOU**
- **YOU ARE READY**

LET'S DO IT

**SOIL
SAND
RICE HUSKS
WATER
SUN
=
ADOBE BRICKS**

INITIAL CALCULATIONS

- HOW MANY BRICKS WILL I NEED?
- HOW MUCH SOIL WILL I NEED?
- HOW MANY BRICKS PER DAY?
- HOW LONG WILL IT TAKE?

SITE PLANNING AND LABOUR

- **AREA TO DELIVER MATERIALS (SOIL AND SAND)**
- **HOW MANY PEOPLE ARE WORKING**
- **BRICK DRYING AREA**
- **DIMENSIONS OF MIXING PIT(S)**
- **TIMING**

THE BUDGET

- EARTHWORKS/FOUNDATIONS
- ROOF
- ADOBE WORK
- ARCHITECTURAL FURNITURE
- WATER AND ELECTRIC
- FLOORING AND DECORATIONS

WORKS SCHEDULE

- EARTHWORKS AND SITE PREP
- BRICK MAKING AND CONCRETE WORKS
- ROOFING
- ADOBE WORK
- FLOORING
- EVERYTHING ELSE

EARTHWORKS AND CONCRETE

NO FIXED DIMENSIONS

THINK ABOUT ROOF STRUCTURE

PREPARE THE SITE

STORE THE BRICKS

READY TO START

ROOF FIRST IS EASIER ALL ROUND

BRICK LAYING 1

BRICK LAYING 2

DOORS

FIX THE BOTTOM

SET STRAIGHT THREE WAYS

USE NAILS ON THE SIDE

PACK WITH STRAW

WINDOWS

**MUST BE SET AND BUILT
AROUND FOR STRENGTH**

**MUST BE STRAIGHT THREE
WAYS**

ANYTHING CAN BE USED

ELECTRICS

PLAN PLUGS AND SOCKETS IN
ADVANCE

CALL ELECTRICIAN

CUT THE CHANNELS

LAY THE WIRES

PLASTER

SOCKETS

USE WOOD AS SUPPORT
ABOUT 5CM IN
PLASTER OVER IF NOT
NEEDED
PICTURE RAILS

PLASTERING

FIRST PLASTER USES THE MORTAR MIX

STRAIGHTEN WALLS AND CORNERS

FINAL PLASTER / OUR RECIPE

sifted soil 1

sifted river sand 2

dry elephant dung 0.5 (or less)

boiled tapioca water 1:10
